SECTION 3 - DESCRIPTION OF SERVICE

3.1 Computation of Charges

- 3.1.1 The total charge for each completed call may be a variable measured charge dependent on the duration, distance and time of day of the call, or may also be dependent only on the duration of the call (flat rate per minute). The variable measured charge is specified as a rate per minute, which is applied to each minute. All calls are measured in increments as set forth in the Rates Section of this tariff. Fractions of a billing increment are rounded up to a full billing increment on a per call basis. Fractions of a cent per minute are rounded up to a full cent on a per call basis.
- 3.1.2 Where mileage bands appear in a rate table, rates for all calls are based upon the airline distance between the originating and terminating points of the call, as determined by the vertical and horizontal coordinates associated with the exchange associated with the originating and terminating telephone numbers. If the Customer obtains access to the Company's network by a dedicated access circuit, that circuit will be assigned an exchange for rating purposes based upon the Customer's main telephone number at the location where the dedicated access circuit terminates. The vertical and horizontal (V & H) coordinates for each exchange and the airline distance between them will be determined according to the V&H Coordinate table contained in AT&T's FCC Tariff No. 10 which is incorporated herein by reference.

3.1.3 Timing begins when the called station is answered and two way communication is possible, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. Recognition of answer supervision is the responsibility of the Underlying Carrier. Timing for each call ends when either party hangs up. Company will not bill for uncompleted calls.

3.2 Customer Complaints and/or Billing Disputes

Customer inquiries or complaints regarding service or accounting may be made in writing or by telephone to the Company at:

**16 South Jefferson Road
Whippany, New Jersey 07981
800-266-4006**

Disputes may also be referred to the Federal Communications Commission, 445 12th Street, S.W., Washington, D.C. 20554.

Any objection to billed charges should be reported promptly to Company. Adjustments to Customers' bills shall be made to the extent that records are available and/or circumstances exist which reasonably indicate that such charges are not in accordance with approved rates or that an adjustment may otherwise be appropriate. Where overbilling of a Customer occurs, due either to Company or Customer error, no liability exists which will require the Company to pay any interest, dividend or other compensation on the amount overbilled.

3.5 Service Offerings**3.5.1 Direct Dialing**

This service permits Customers to originate calls via switched, dedicated, or high capacity access lines, and to terminate calls to the locations specified in the rate section of this tariff. Calls may be made to locations in different States within the United States, or between the United States and international locations set forth herein. Customers may place calls from any location in the United States where the Company has access to local exchange access service. Access is available to Customers who subscribe to a local exchange telephone company's interstate end user common line service, and to their authorized users. Access is obtained either by presubscription to the Company as the primary interexchange carrier for the end user common line; or by dialing an access code assigned to the Company by the local exchange telephone company. To call within the US, Customer dials 1+area code+7 digit number or 101XXXX+ area code and 7 digit number and to call internationally the Customer dials 011+country code+telephone number.

3.5.2 Travel Cards - Domestic Only.

The Customer utilizes an 11-digit "toll-free" access number established by the Company to make a call. When calling from home, upon receiving a voice prompt, the Customer uses push button dialing to enter the ten-digit number of the called party. When calling away from home, upon receiving a voice prompt, the Customer uses push button dialing to enter an identification code assigned by the Company, and the ten-digit number of the called party.

3.5.3 Domestic Toll-Free.

This service is a direct access, incoming only. Toll Free Service is an inbound-only service in which callers located in the United States may place toll-free calls to a telephone number in the toll-free area code assigned to Customer. Calls may be terminated either to the Customer's local exchange telephone service, or to a dedicated access line.

3.5.4 International Toll Free Service (ITFS)

This service is an inbound calling service which provides the Customer with a toll-free number in a foreign country, enabling callers in that country to access the Customer's US location free of charge. Calls may originate from points specified in this tariff, provided the specific foreign administration supplies a toll free service number. Calls may terminate in the United States. Calls to the ITFS number are billed to the US Customer, rather than the call originator.

3.5.5 Prepaid Calling Cards.

This service permits use of Prepaid Calling Cards for placing long distance calls. Customers may purchase Prepaid Calling Cards at a variety of retail outlets or through other distribution channels. Prepaid Calling Card service is accessed using the toll-free number printed on the card. The caller is prompted by an automated voice response system to enter his/her Authorization Code, and then to enter the terminating telephone number. A processor tracks the call duration on a real time basis to determine the number of Telecom Units consumed. The total consumed Telecom Units for each call is deducted from the remaining Telecom Unit balance on the Customer's Prepaid Calling Card.

DOMESTIC AND INTERNATIONAL MESSAGE TELECOMMUNICATIONS SERVICES

All calls must be charged against a Prepaid Calling Card that has a sufficient Telecom Unit balance. A Customer's call will be interrupted with an announcement when the balance is about to be depleted.

In order to continue the call, the Customer may have the option to call the toll-free number on the back of the Prepaid Calling Card and "recharge" the balance on the card using a nationally recognized credit card. Calls in progress will be terminated by the Company if the balance on the Prepaid Calling Card is insufficient to continue the call and the Customer fails to enter the number of another valid Prepaid Calling Card prior to termination.

A card will expire on the date printed on the card, and if no date is specified, 180 days year from the date of purchase, or the date of last recharge, whichever is later. The Company will not refund unused balances.

The Company will block all calls beginning with the NPA "900" and NXX "976" calls, therefore such calls can not be completed.

A credit allowance for Company Prepaid Calling Card Service is applicable to calls that are interrupted due to poor transmission, one-way transmission, or involuntary disconnection of a call. To receive the proper credit, the Customer must notify the Company at the designated tollfree customer service number printed on the Company Prepaid Calling Card and furnish the called number, the trouble experienced (e.g. cut-off, noisy circuit, etc.), and the approximate time that the call was placed.

DOMESTIC AND INTERNATIONAL MESSAGE TELECOMMUNICATIONS SERVICES

3.5.6 Directory Assistance - Domestic Only.

Access to long distance directory assistance is obtained by dialing 1 + (area code) + 5551212. When more than one number is requested in a single call, a charge will apply for each number requested. A charge will be applicable for each number requested, whether or not the number is listed or published.

3.5.7 International Call Connection

The Customer dials a preassigned direct inward dialing number, listens for two (2) rings, and then hangs up. The Company's enhanced service platform identifies the calling party and immediately calls back the Customer at a prearranged number of the Customer. Upon answering the call, the Customer is prompted to enter an optional security code and then the number for the destination call. Multiple calls can be made once the call has been established by dialing the # key two (2) consecutive times between calls. No calls will be allowed to countries, which prohibit call back services.
